WORK EXPERIENCE

Ipoteka Bank (OTP Group) — Jun 2023 — present

Mobile Developer · Banking

- Built 2 apps for bank staff: checking loan collateral (Monitoring) and handling problem loans (Unduruv).
- The apps are connected to the bank's systems and work even offline.
- New versions reach employees' phones automatically.

IDEA — Sep 2022 — May 2023

Mobile Developer · Retail chain

- Built a delivery tracking app.
- Staff at 60+ branches issue installment plans to customers through this app.

E-Invoice — Nov 2020 — Dec 2022

Mobile Developer · E-documents

- An app to create invoices and acts on the phone and sign them with a digital signature.
- Shipped regular updates on Google Play.

PROJECTS

Monitoring — A phone app: the employee inspects the property on site, writes a conclusion and creates the report right there.

Unduruv — An app for staff who handle problem loans: list of debtors, addresses on a map, payment promises and statistics — all on one phone.

Farovon (Google Play) — An app to keep your money under control. Just say an expense out loud — the app records it. AI suggests where you can save.

IQ School — A school management system: teachers, the principal, students and parents each have their own dashboard. Timetable, attendance, grades and online lessons.

WedLink — Online wedding invitations: music, the venue on a map and a button for guests to reply "I'll come".

SKILLS

Kotlin · Swift · Jetpack Compose · MVI / MVVM · Clean Architecture · Coroutines / Flow · Room · Retrofit · WebSocket · WebRTC · Firebase · Google Maps · Spring Boot · PostgreSQL · Redis · Vue / React · Git · Claude / ChatGPT / Gemini

EDUCATION

Tashkent University of Information Technologies (TUIT)
Bachelor's · Computer Engineering
